Nagpur, India | aniketroy9662@gmail.com | (+91) 7709291037 | LinkedIn | Github

## PROFESSIONAL SUMMARY

Certified Ethical Hacker (**CEH v13**) with hands-on experience in VAPT, cloud security, and digital forensics through multiple internships and practical cybersecurity projects. Proficient in tools like Burp Suite, Nmap, Wireshark, and Kali Linux for vulnerability assessment and security analysis. Experienced in implementing IAM, RBAC, and least-privilege access controls, along with developing security-focused projects including a blockchain-based CMS and web vulnerability scanner. Actively involved in cybersecurity communities and events like Smart India Hackathon and DEFCON Delhi.

## EDUCATION

## SKILLS

VAPT:SAST, DAST, Web Application Security, Mobile Application Security, OWASP Top 10  
Security Tools: Burp Suite, SonarQube, SonarScanner, MobSF, Nmap, Kali Linux, Wireshark, Microsoft Sentinel, Microsoft Defender  
Programming & Development: Python, C, C++, HTML/CSS, JavaScript, React, MySQL, GitHub, Java,  
Cloud & Platforms: AWS, Linux, Windows, VMware, Ollama, OpenRouter, Vs Code, Antigravity, Opencode, Kiro

## EXPERIENCE

### VAPT Engineer — Writer Information, Mumbai

Client: Montran, India

Aug 2026 – Present

- Perform SAST and DAST assessments for web, Android, and iOS applications using SonarQube, SonarScanner, Burp Suite, and MobSF.
- Conduct Vulnerability Assessment & Penetration Testing (VAPT) and manual security testing aligned with OWASP methodologies.
- Validate and document vulnerabilities with technical evidence, severity assessment, and remediation recommendations.

### Cybersecurity Trainee Intern

Dec 2025 - May 2026

*Low Latency Technologies*

- Assist in securing cloud infrastructure, AI agent pipelines, and LLM deployments by identifying vulnerabilities and applying security best practices across multi-cloud environments.
- Enforce IAM policies, least-privilege access controls, role-based access control (RBAC), and service account governance to reduce attack surface and strengthen data security posture.

### Cybersecurity & Digital Forensic Intern

April 2025 - June 2025

*Cyber Secured India (CSI)*

- Conducted digital forensics investigations using Burp Suite and PortSwigger, identifying and exploiting OWASP Top 10 vulnerabilities in web applications.
- Performed manual and automated vulnerability assessments and delivered detailed remediation reports.

### Cybersecurity Intern

June 2025

*Deloitte*

- Gained exposure to real-world threat modeling, SOC workflows, and enterprise-level incident response processes.
- Collaborated with teams across cloud security, risk management, and digital forensics to assess organizational security

## PROJECTS

- Trinetra is an AI-powered SIEM + SOC + XDR + SOAR Lite cybersecurity
- PyPentest – Web Vulnerability Scanner
- Shadow Access Detector – AWS EC2
- Universal Blockchain CMS Plugin

## CERTIFICATIONS

- CEH v13 – EC-Council
- Introduction to Cyber Security – CISCO
- Introduction to Dark Web – EC-Council
- Ethical Hacking – Nikist Media
- Describe security capabilities of Microsoft Sentinel

## ACHIEVEMENTS

- Participated in Smart India Hackathon (SIH).
- DEFCON Delhi (DC9111): Attended workshops on hardware hacking and cybersecurity awareness.
